

Networked Lecture Hall for Simultaneous In-Person and Remote Learning

This easily scaled system allows a lecturer to simultaneously and seamlessly share audio and video content to attendees in the hall, students in overflow areas around campus, online UC services, and school lecture capture systems.

- NUC PC handles UC Client software and Shure IntelliMix DSP software with Dante
- Lecturer may use directional ceiling mic or handheld mic
- Multiple mics allow for in-person audience participation, Q&A
- Video sent from PC to AV-over-IP encoder for distribution via network to projector, etc.
- A single port connects all audio and video to any lecture capture and re-distribution system for streaming, recording
- Includes Dante-enabled loop amplifier for assisted listening in room
- Easily extended to other endpoints on campus network to accommodate overflow, use of multiple rooms for isolation
